Art intervention and evaluation by Christiane Limper

SEE THINGS FROM A NEW PERSPECTIVE

Art intervention and evaluation

The artist Christiane Limper followed the Culture Task Force Conference with live drawings in her own artistic style.

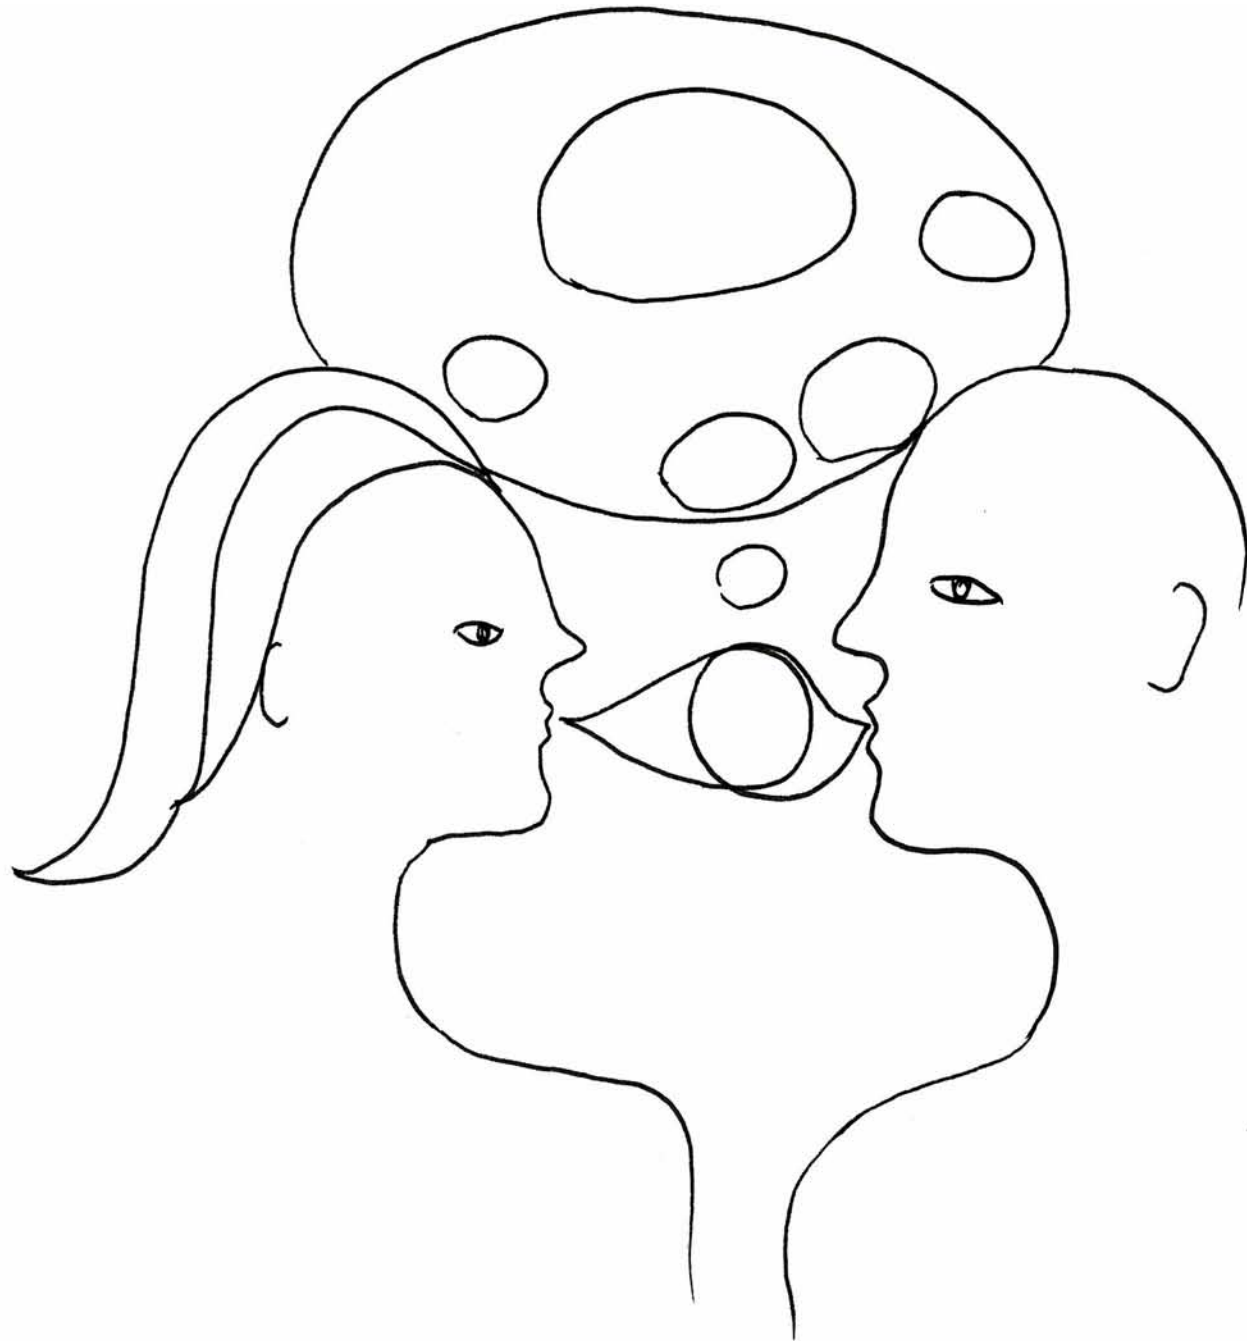

She noted down key words and visualized the projects, which were presented by the international delegates from the European Cross Border Regions.

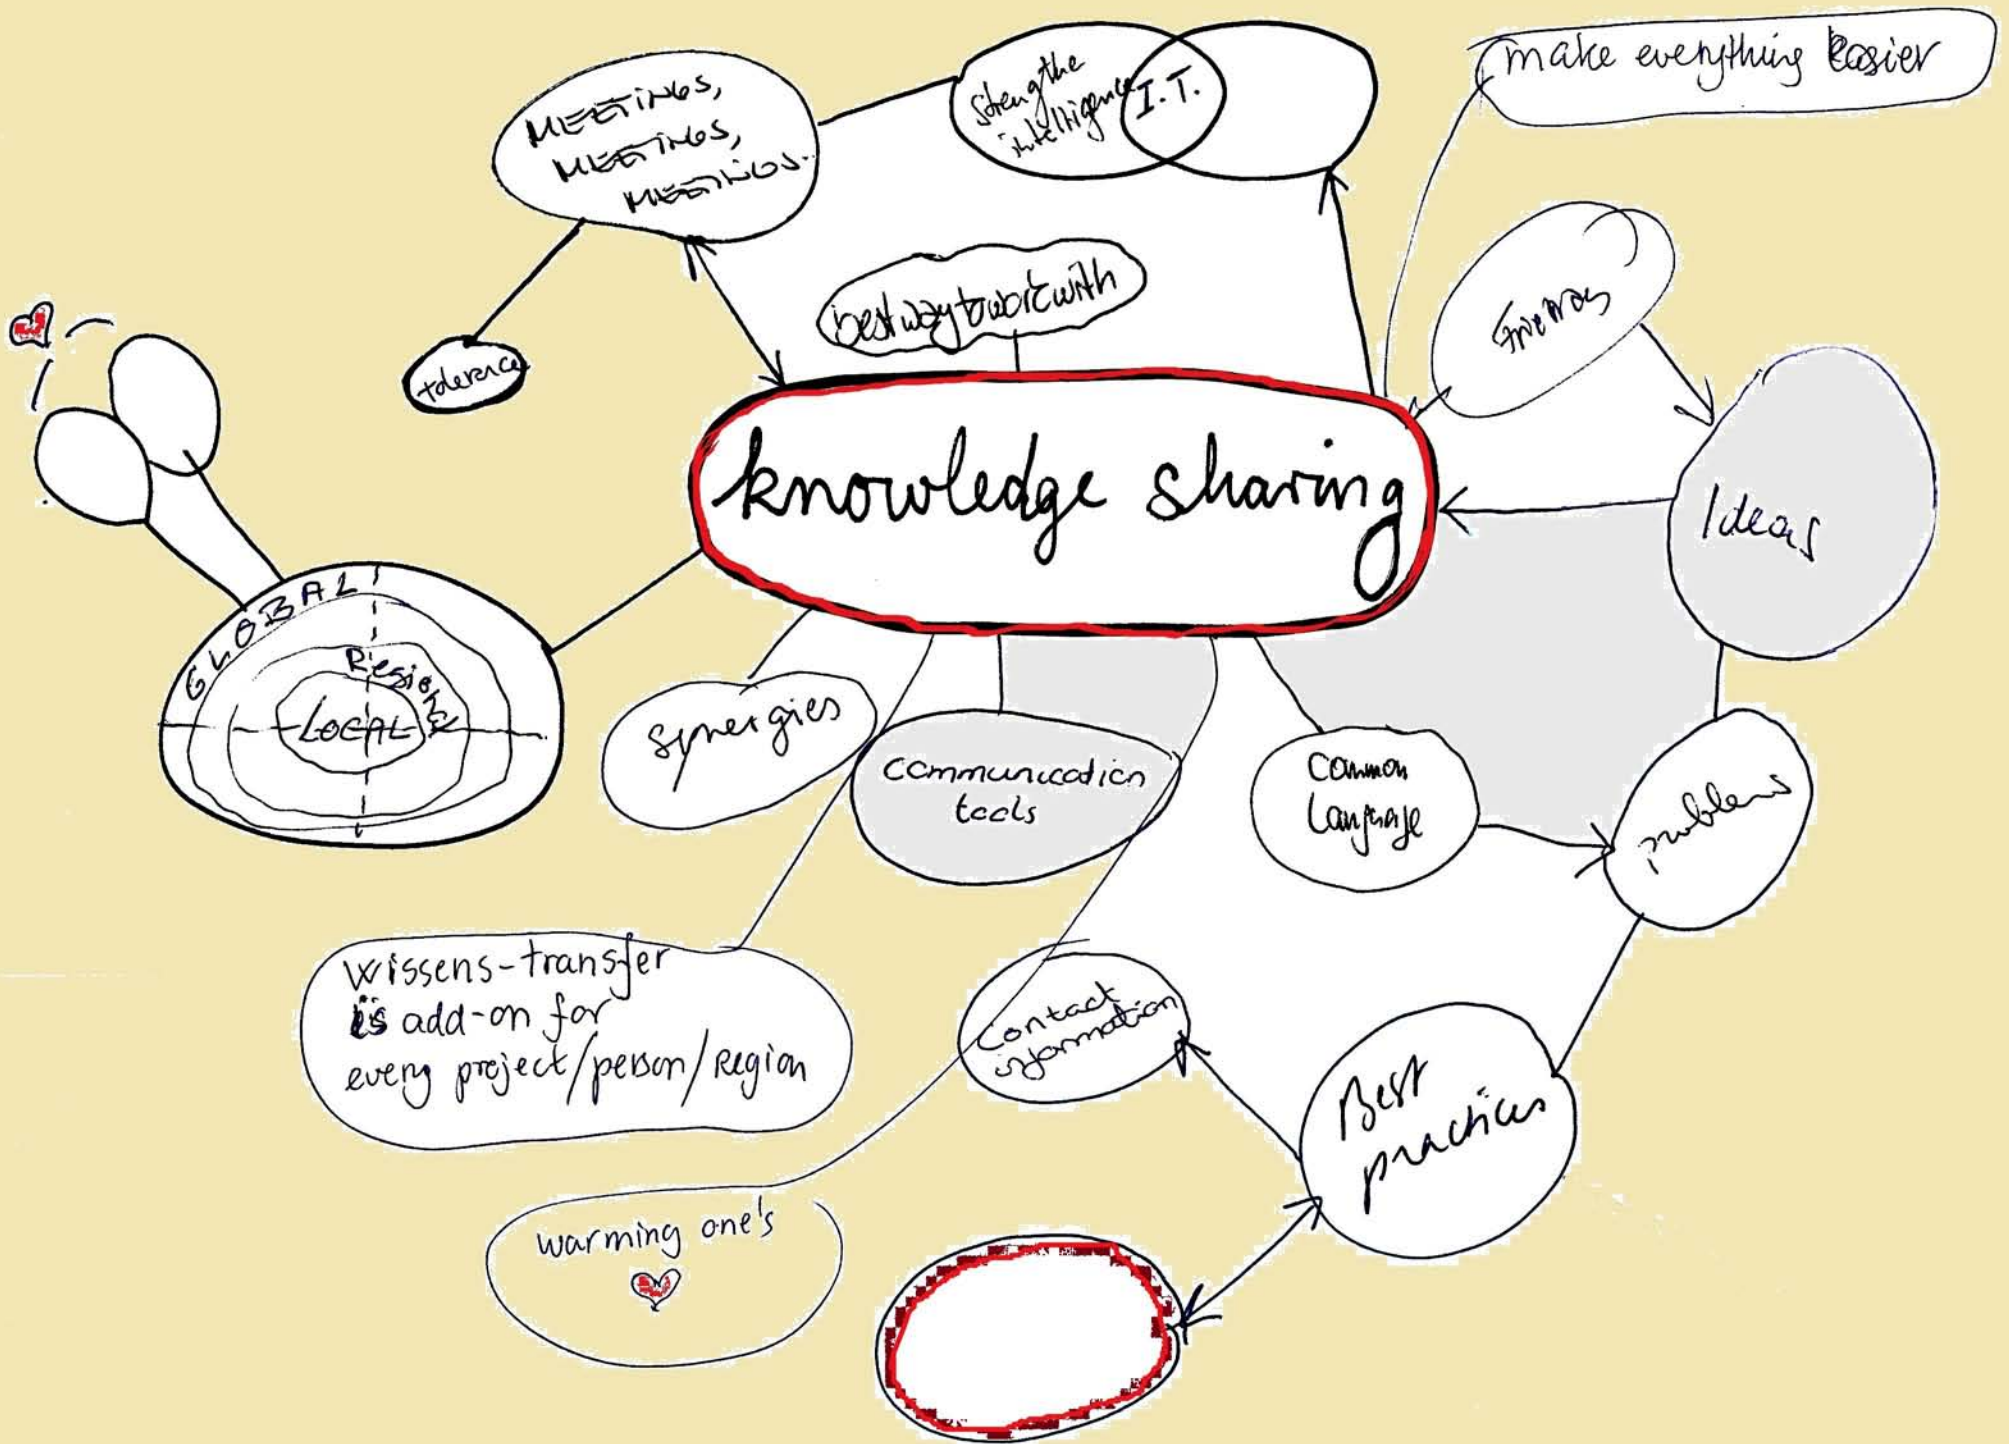

Delegates were asked to give their feedback upon the drawings as an evaluation of the conference.

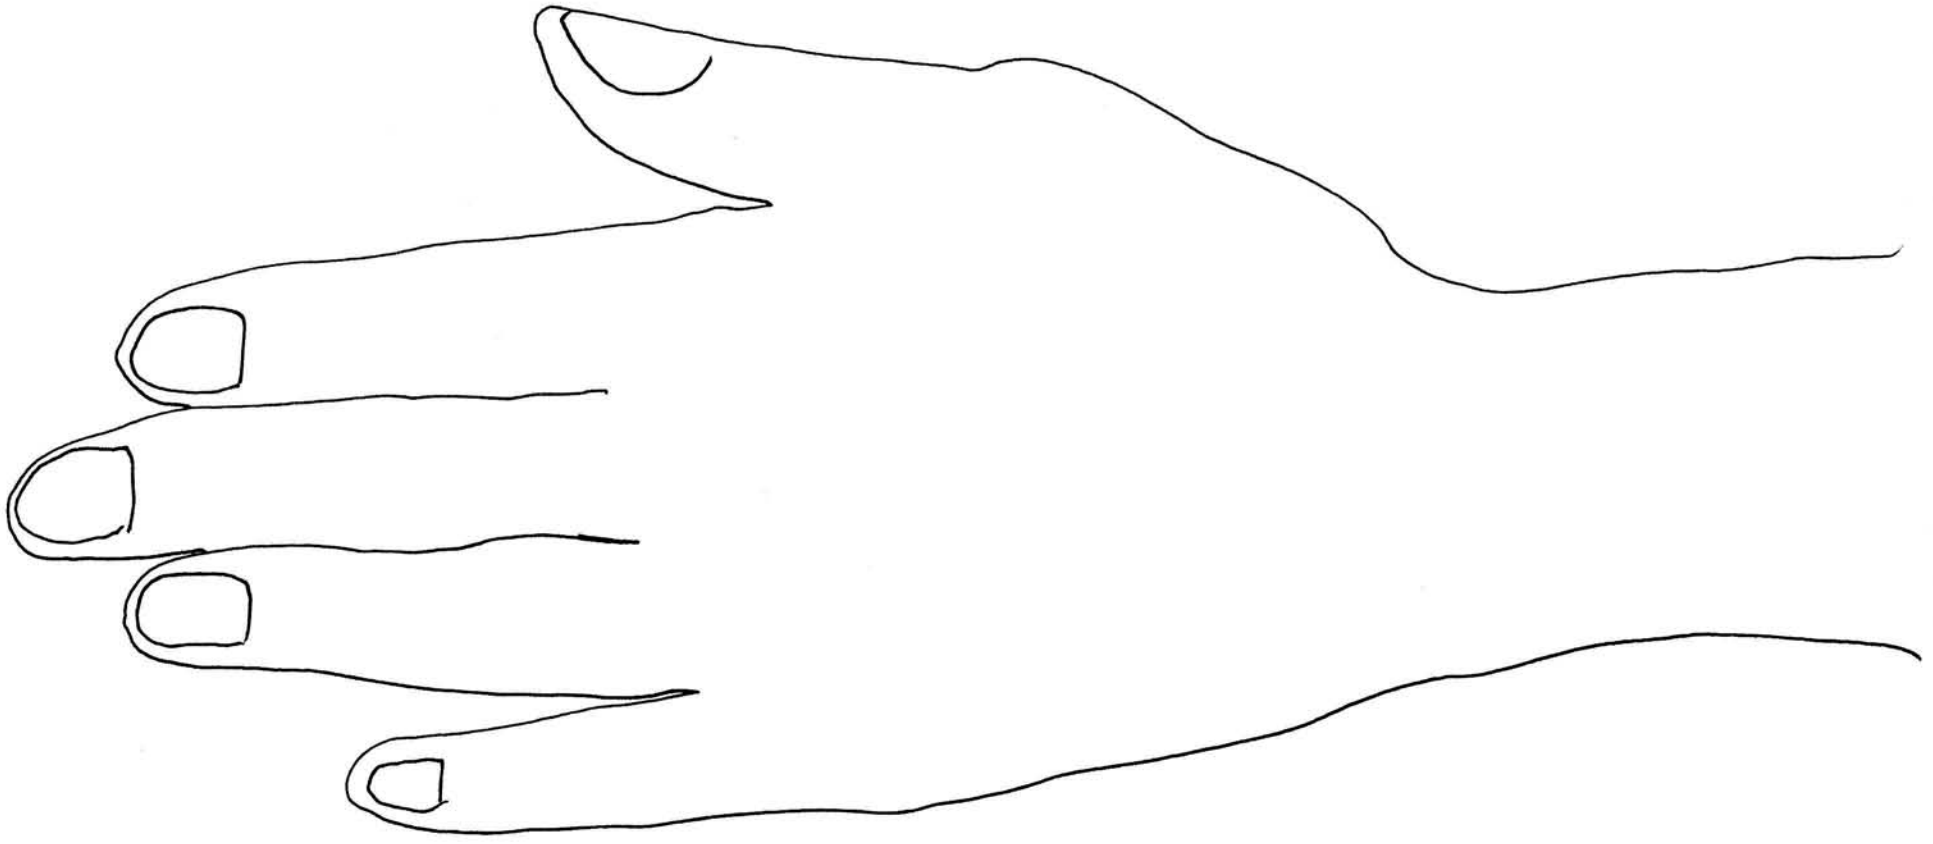

In terms of sustainability the drawings help to memorize the event in a more personal way and show that a cross border cultural dialogue is on its way...
